

This overview is generated from approved records and identifies non-obvious spatial patterns using proximity hotspots, county concentrations, and potential linear alignments.

Approved records 13	Raw locations 13	Pattern clusters 1	Protected 10
------------------------	---------------------	-----------------------	-----------------

Clustered pattern signals

Proximity hotspot		3
-------------------	-------------	---

Cluster	Type	County	Evidence	Records
Proximity hotspot	Proximity	Unknown	3 records within ~15.0 km of centroid	3

Map view: geospatial density grid

Approximate event density by coordinate grid (higher values indicate hotspots).						
Latitude ↓ / Longitude →	-3.8--3.2	-3.2--2.6	-2.6--1.9	-1.9--1.3	-1.3--0.7	-0.7--0.1
54.3–53.6	0	0	0	1	0	0
53.6–53.0	0	0	2	1	1	0
53.0–52.3	0	0	0	0	0	0
52.3–51.6	1	0	0	1	1	1
51.6–50.9	0	0	0	1	2	1

Research guidance

- Cross-check date claims against primary sources.
- Compare local newspaper reporting and archival records.
- Record uncertainty explicitly in research notes.
- Keep citation references tied to each factual claim.
